MAGNUM RIMFIRE

B.MAG Target Beavertail, Heavy Barrel & Sporter

Savage Arms™ created a whole new class of rimfire rifle when it designed the B.MAG, and the company has added to its success with three new models: the Target Beavertail, Heavy Barrel and Sporter. The B.MAG was built around the 17 Win. Super Magnum cartridge, which creates unprecedented rimfire velocities of up to 3,000 feet per second. To make the most of the load's potential, Savage gave the rifle features usually reserved for centerfires, such as an action with rear locking lugs, a cock-on-close bolt, thread-in barrel headspacing and a center-feed rotary magazine. The B.MAG also has Savage's game-changing AccuTrigger™, which shooters can safely adjust for a light, clean pull. Those features make the B.MAG an even more accurate platform for the round.

Features & Benefits

- Designed specifically for the 17 Win. Super Magnum cartridge
- Target Beavertail model has a heavy matte black barrel and gray wood-laminate stock
- Sporter model has a wood-laminate stock and hunting-class matte black barrel
- Heavy Barrel model features a matte black finish and rugged composite stock
- Adjustable AccuTrigger
- Compact action with rear locking lugs
- Eight-round, center-feed rotary magazine
- Thread-in barrel headspacing
- Soft rubber butt pad
