CENTERFIRE RIFLES

6mm Creedmoor Line Extensions

Propelled by the surging popularity of the 6.5 Creedmoor, the new 6mm Creedmoor cartridge is poised to become the hottest chambering in the shooting sports. That's why Savage is thrilled to add the cartridge to three of its most advanced rifle platforms—the 10 GRS, 10 FCP-SR and the all-new 10 Stealth Evolution. The inherent accuracy and high ballistic coefficient of 6mm bullets provide extreme long-range precision for competition and hunting medium to big game in a short-action cartridge. Velocities are also optimized for the flattest possible trajectories and extended barrel life, while recoil is kept to a bare minimum.

Features & Benefits

- New 6mm Creedmoor chamberings in 10 GRS, 10 FCP-SR and 10 Stealth Evolution
- 6mm bullets are inherently accurate and offer high ballistic coefficients
- Extreme long-range precision for competition and hunting medium to big game
