Originally only offered through the Savage® Special Order Office, the 212/220 Turkey is now available everywhere. It's built around the Model 110 rifle action, which is machined from steel bar stock and secured three-dimensionally along its entire length by the AccuStock™ internal chassis. The blued, 22-inch carbon steel barrel is free-floating and secured to the receiver using a Model 110-style locking nut that ensures shot-to-shot consistency. Our user-adjustable AccuTrigger™ provides a light, crisp pull,

and the AccuFit™ system allows hunters to customize length-of-pull and comb height for precision you won't find in any other turkey gun. The detachable, two-round magazine enables quick loading, and the oversize bolt knob helps operation with gloved hands.
